

*Global changes, climate services and
multidisciplinarity: some aspects of
the relevant research in France*

H. Le Treut, LMD, IPSL, UPMC

<http://cnfcg.ipsl.fr>

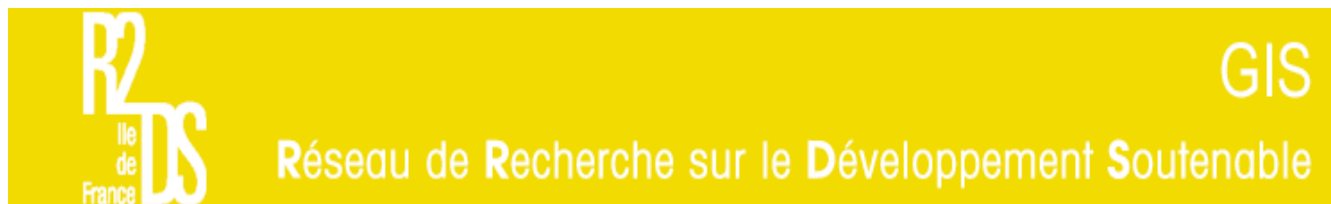

A long tradition of interdisciplinary studies

A programme from the Ministry of Ecology and Sustainable Development, operating since 1998:
climate evolution, impacts on ecosystems, human health, adaptation, development of scientific knowledge for public policies

Interdisciplinary alliances in the Paris Area, dealing with Climate Environment and Society

A national scheme for scientific funding relying on different actors:

- ANR (National Agency for Research)
- CNRS (National Centre for Scientific Research)

.... and all « Allenvi » partners

Les 12 membres fondateurs

12 founding members

Les 15 membres associés

15 associate members

« Allenvi »: a new Alliance gathering 27 institutions involved with Environmental Sciences

The creation of environmental services

A strong involvement in European Structures :

- JPI mechanisms
- GMES
- Climate KIC

..... and many others

A strong involvement in international programmes :

- 50 scientists involved in SSGs of WCRP, IGBP, Diversitas, IHDP (?)
- 20 to 30 CLA, LA or RE in IPCC or IPBES (?)

A real challenge: find a « home » for those activities in the « Future Earth Structure »
